

Other Blackmer Technology

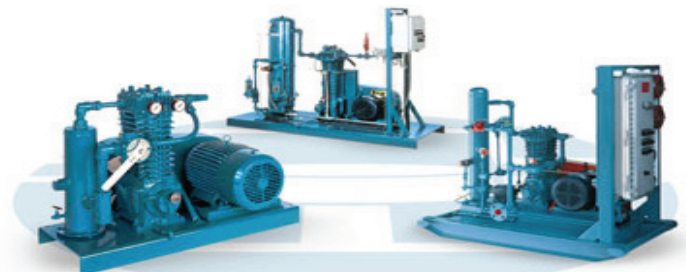

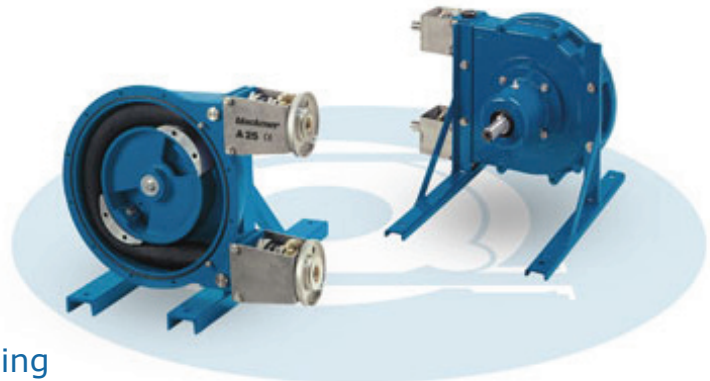

Eccentric Disc / Mouvex Technology

- Extremely unique pump design
- No mechanical seal
- Extremely low shear due to gentle pumping action
- Excellent with abrasive fluids due to low internal velocities
- Clean In Place (CIP) capabilities
- Self-priming, good vacuum qualities with "line stripping" abilities
- Can run dry for a short period of time

Peristaltic Hose Pump

- True positive displacement
- Highly engineered hose materials for durability
- Highly predictable
- Repaired quickly and inexpensively
- Excellent for abrasives
- Self priming capabilities
- Can run dry- great for tank or line stripping

Blackmer Compressor Technology

- Rotary Screw Compressors
- Rotary Vane Compressors
- Reciprocating Gas Compressors
