

Gasket Technologies

DuBric provides cutting edge materials from the oldest packing and seal company in the world for all of your gasket applications. Reduce your leakage, labor, and increase overall service life with our reliable gasket materials regardless of pressure or temperature extremes. Consult with a DuBric Equipment Reliability Specialist to document all of the important application parameters, confirm the flange or equipment condition is appropriate, and to recommend a material that is best suited for your application.

SELCO- The Most Reliable Gasket Known to Industry

- Outperforms Spiral-wound type gaskets
- Simple installation
- Reduce your inventory
- Unaffected by temperature, corrosion, or thermal cycling
- Low seating stress
- Fewer re-torques
- Combine with live load for ultimate reliability
