

Mechanical Seal Technology

The DuBric Equipment Reliability Specialists are willing to research the specifics of your mechanical seal application, engineer a solution, and make recommendations for the most reliable and cost effective technology. With the entire arsenal of the Chesterton sealing line at our fingertips, nearly any mechanical seal design is available. We also represent a specialized division which can custom engineer a seal design specific to your equipment for difficult applications. Please refer to the "Enviroseal Spiraltrac bushing" section of this website to understand the advantages of the proper mechanical seal environmental controls.

Standard Mechanical Seal Configurations Available

- Component mechanical seal
- Cartridge mechanical seal
- Split Mechanical Seal
